

Skill training made Vegetable Cultivation Fruit Full

Name of the Farmers : Niranjan Kr.
District : Palamu
State : Jharkhand

Background

Mr. Niranjan Kumar S/o Manoj Prajapati is a Farmer from Village Jamune in Palamu District. He is young and enthusiastic Farmer who is practicing farming to sustain his family. He is taking education but wants to support family by his extra efforts. He made his efforts in agriculture apart from other economic activities.

He has 2 acres of land in which he does farming on vegetables in one acre of land. He also cultivates rice, maize, wheat and mustard.

He cultivates potato during Rabi season. He also started cultivation of cabbage, cauliflower and broccoli.

Training & Motivation

He was doing cultivation of traditional crops like rice, wheat, maize, mustard but wanted to earn extra income from vegetable cultivation. He participated in one week skill-based training programme on the topic **IPM in vegetable cultivation** under STRY, the component implemented Under SMAE by the ministry. The training was conducted by ATMA Palamu. He was introduced to different crops of vegetables. He was given training on Package of Practice of vegetable cultivation. The training was conducted during 08.02.2022 to 14.02.2022 by ATMA Palamu, Jharkhand in association with SAMETI, Jharkhand and MANAGE Hyderabad.

Socio-economic impact of program

- The Skill based training program helped Mr. Niranjan Kumar to acquire knowledge and skill required for vegetable cultivation which encouraged him to take up vegetable cultivation as a cash crop.
- Before training, He was able to generate an income of not more than Rs. 50,000 annually. The training helped in generating an income more than Rs 1,50,000 per year.

Contribution of the program

- Skills learnt during the training program helped to understand the importance of vegetable cultivation.

Awards & Recognition

By observing the income and passion of Mr. Niranjan Kumar, other youth from that locality are also interested in taking up farming like him. He has emerged as a role model for local

Training Coverage

Introduction to principles and practices of vegetable cultivation, constraints and use of Drip irrigation along with polyhouse. in this training the integrated pest management was main focus area. so that farmer could use optimum amount of insecticides and pesticides.
